jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

## EDUCATION

---

**Cornell University**, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

**Expected December 2027**

**The University of Hong Kong**, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

**June 2026**

**University of Oxford**, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

**July 2025**

*Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning*

## SKILLS

---

**Programming:** Python, C++, R, SQL, Shell scripting, Git, Linux

**Quantitative:** Electronic Trading Research, Market Data, Backtesting, Portfolio Risk, Optimization, Point-in-Time Research

**Machine Learning / AI:** Data pipelines, embeddings, cosine similarity, DeepSeek classification and refinement

## QUANTITATIVE RESEARCH EXPERIENCE

---

**Quantitative Researcher**, *Dymon Asia Capital (HK) Limited*, Hong Kong

**May - Aug. 2026**

- Translated investment-index methodologies into point-in-time eligibility, liquidity, market-capitalization, and buffer-selection rules, building reusable quantitative research infrastructure.
- Extracted and integrated market and financial data from FactSet and Bloomberg, alongside ERD and HKEX filings, into an auditable Python pipeline with a shareholder-evidence-based free-float engine.
- Evaluated three HSCI rebalances with leakage controls; the resulting research achieved an 82.6% action-level hit rate (185 of 224 additions and deletions).

**Quantitative Strategy Analyst Intern**, *Nine Martingale Investment Management, Ltd.*, Shanghai

**July - Sep. 2025**

- Built a five-year factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3 through systematic signal research.
- Diagnosed a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Analyzed daily exposures to ten Barra style factors to explain signal behavior and portfolio style tilts.

**Quantitative Strategy Analyst Intern**, *Northeast Securities Co., Ltd.*, Shanghai

**July - Sep. 2024**

- Developed mean-variance and risk-parity portfolio models in a 15-year daily-rebalanced backtesting framework.
- Used Monte Carlo methods to approximate equal-risk-contribution weights by minimizing differences in asset risk contributions.

**Quantitative Researcher Intern**, *Rivermap Company Limited*, Hong Kong

**Feb. - Apr. 2026**

- Integrated financial and company-text data in Python/Pandas, producing auditable intermediate outputs and relevance diagnostics for thematic stock selection.
- Implemented BGE embeddings, cosine similarity, and DeepSeek-based refinement to map investment themes to a proprietary sector taxonomy.

## SELECTED ELECTRONIC TRADING RESEARCH

---

**Researcher**, *HKU Quant Trading Team*, Hong Kong

**Feb. - Aug. 2026**

- Built a Python research and execution workflow for live market scanning, opportunity ranking, position-limit checks, order-book simulation or submission, and realized P&L tracking.
- Analyzed historical market prices and realized outcomes by topic, contract structure, and time to resolution, identifying pricing gaps above 3 percentage points.

**Independent Researcher**, *University of Oxford*, Oxford, United Kingdom

**Jan. - June 2025**

- Modeled Lightning Network channel management as a discounted MDP under stochastic payments and implemented value iteration to evaluate liquidity policies.

## ACTIVITIES / INTERESTS

---

HKU Young Scientist Scheme; F1 racing; Texas Hold'em poker; running
