

Jing Xiang Xu

jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

cell: 607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Multi-Asset Research, Portfolio Optimization, Risk Parity, Factor Research, Backtesting, Market Data

AI/ML: Python/Pandas pipelines, embeddings, cosine similarity, DeepSeek classification and refinement

EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong

May - Aug. 2026

- Translated HSCI and HSTECH rebalancing methodologies into point-in-time eligibility, liquidity, market-capitalization, and buffer-selection signals to predict additions and deletions before announcements.
- Built an auditable ranked-waterfall Python pipeline integrating FactSet and Bloomberg market data, ERD data, and HKEX filings, including a filing-based free-float engine and DeepSeek-assisted classification gates.
- Achieved an 82.6% action-level hit rate (185 of 224 additions and deletions) across three HSCI rebalances in leakage-controlled, point-in-time evaluations.

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong

Feb. - Apr. 2026

- Automated thematic stock selection by translating unstructured investment themes into supply-chain dimensions and mapping them to a proprietary sector taxonomy.
- Built a Python/Pandas pipeline integrating sector, revenue-segment, and company-description data, producing auditable intermediate outputs and relevance diagnostics.
- Designed a two-stage semantic retrieval framework using BGE embeddings and cosine similarity, followed by DeepSeek-based refinement and dimension assignment.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai

July - Sep. 2025

- Identified a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Built a factor-backtesting framework that improved annualized return by 6% and Sharpe ratio by 0.3 over five years.
- Analyzed daily exposures to 10 Barra style factors to characterize signals and portfolio style tilts.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai

July - Sep. 2024

- Developed mean-variance and risk-parity models within a 15-year daily-rebalanced backtesting framework.
- Implemented a Monte Carlo approach to approximate ERC weights by minimizing differences in asset risk contributions.

PROJECTS

Researcher, *HKU Quant Trading Team*, Hong Kong

Feb. - Aug. 2026

- Analyzed historical Polymarket prices and realized outcomes by topic, market structure, and time to resolution; identified Yes/No shares with pricing gaps above 3 percentage points.
- Built a Python pipeline that scanned live markets, ranked opportunities, enforced position limits, simulated or submitted order-book orders, and tracked resolved trades and realized P&L.

Independent Researcher, *University of Oxford*, Oxford, United Kingdom

Jan. - June 2025

- Modeled Lightning Network channel management as a discounted MDP, deriving routing, liquidity-reset, and capacity policies under stochastic payments.
- Implemented value iteration for discrete and exponential payment distributions and analyzed the liquidity effects of bidirectional flows.

ACTIVITIES/INTERESTS

HKU Young Scientist Scheme; F1 racing; Texas Hold'em poker; running
