

Jing Xiang Xu

jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Performance Evaluation, Risk Analysis, Portfolio Optimization, Backtesting

Machine Learning / AI: Python/Pandas pipelines; embeddings, cosine similarity, DeepSeek classification

EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong

May - Aug. 2026

- Built an auditable Python pipeline integrating FactSet, ERD, and HKEX filings, combining classification outputs and shareholder evidence in a filing-based free-float engine.
- Translated index methodologies into point-in-time eligibility, liquidity, market-capitalization, and buffer-selection rules to predict HSCI and HSTECH constituent changes.
- Evaluated predictions without future information, achieving an 82.6% action-level hit rate (185 of 224 actions) across three historical HSCI rebalances.

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong

Feb. - Apr. 2026

- Integrated sector, revenue-segment, and company-description data in Python/Pandas, producing auditable intermediate outputs and segment-level relevance diagnostics.
- Automated investment-theme analysis using supply-chain dimensions, BGE embeddings, cosine similarity, and DeepSeek-based refinement within a proprietary sector taxonomy.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai

July - Sep. 2025

- Analyzed daily exposures to 10 Barra style factors to distinguish signal characteristics and portfolio style tilts.
- Corrected a 60-day dividend-event data lag and factor alignment, improving information coefficient by 0.02.
- Built a five-year factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai

July - Sep. 2024

- Developed mean-variance and risk-parity models within a 15-year daily-rebalanced simulation framework.
- Implemented a Monte Carlo approach to approximate ERC weights by minimizing differences in asset risk contributions.

SELECTED QUANTITATIVE PROJECTS

Researcher, *HKU Quant Trading Team*, Hong Kong

Feb. - Aug. 2026

- Evaluated differences between market prices and realized outcomes by topic, structure, and time to resolution; refreshed estimates monthly and found pricing gaps above 3 percentage points.
- Built a Python pipeline connecting market scans, opportunity ranking, position limits, order simulation or submission, and resolved-trade P&L measurement.

Independent Researcher, *University of Oxford*, Oxford, United Kingdom

Jan. - June 2025

- Modeled Lightning Network channel management as a discounted MDP under stochastic unidirectional and bidirectional payments.
- Implemented value iteration for discrete and exponential payment distributions and analyzed the liquidity effects of bidirectional flows.
