jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY
Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Research Pipelines, Factor Backtesting, Numerical Optimization, Portfolio Models

Machine Learning / AI: Python/Pandas workflows; BGE embeddings, cosine similarity, DeepSeek refinement

QUANTITATIVE RESEARCH AND DEVELOPMENT EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong

May - Aug. 2026

- Developed an auditable Python research pipeline integrating FactSet, ERD, and HKEX filings to generate point-in-time HSCI and HSTECH index-rebalance predictions.
- Codified eligibility, liquidity, market-capitalization, and buffer-selection rules; implemented a filing-based free-float engine and DeepSeek-assisted classification gates.
- Validated predictions across three HSCI rebalances with leakage controls, achieving an 82.6% action-level hit rate (185 of 224 additions and deletions).

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong

Feb. - Apr. 2026

- Engineered a Python/Pandas pipeline integrating sector, revenue-segment, and company-description data, with auditable intermediate outputs and relevance diagnostics.
- Converted investment themes into supply-chain dimensions and a proprietary sector taxonomy; implemented BGE embedding retrieval, cosine-similarity ranking, and DeepSeek-based refinement.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai

July - Sep. 2025

- Built a five-year factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3.
- Diagnosed a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Analyzed daily exposures to ten Barra style factors to characterize investment signals and portfolio style tilts.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai

July - Sep. 2024

- Implemented mean-variance and risk-parity models in a 15-year daily-rebalanced backtesting framework.
- Used Monte Carlo methods to approximate equal-risk-contribution weights by minimizing differences in asset risk contributions.

SELECTED QUANTITATIVE PROJECTS

Independent Researcher, *University of Oxford*, Oxford, United Kingdom

Jan. - June 2025

- Formulated Lightning Network channel management as a discounted MDP; implemented value iteration under discrete and exponential payment distributions to evaluate routing, liquidity-reset, and capacity policies.

Researcher, *HKU Quant Trading Team*, Hong Kong

Feb. - Aug. 2026

- Built a Python workflow connecting live market scans, opportunity ranking, position-limit checks, order-book simulation or submission, and realized P&L tracking.
- Grouped historical contracts by topic, structure, and time to resolution; refreshed estimates monthly to identify price-outcome gaps above 3 percentage points.
