jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Data Integration, Data Quality, Backtesting, Numerical Optimization

Machine Learning / AI: Python/Pandas pipelines; embeddings, cosine similarity, DeepSeek classification

EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong

May - Aug. 2026

- Engineered an auditable ranked-waterfall Python pipeline integrating FactSet, ERD, and HKEX filings for point-in-time index-rebalance research.
- Built a filing-based free-float engine mapping shareholder evidence to ten HSIL categories, alongside DeepSeek-assisted Theme and Innovation classification gates.
- Implemented eligibility, liquidity, market-capitalization, and buffer rules; validated predictions on three HSCI rebalances, achieving an 82.6% hit rate (185 of 224 actions).

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong

Feb. - Apr. 2026

- Built a Python/Pandas pipeline integrating sector, revenue-segment, and company-description data, with auditable intermediate outputs and segment-level diagnostics.
- Converted unstructured investment themes into supply-chain dimensions mapped to a proprietary sector taxonomy.
- Implemented two-stage semantic retrieval with BGE embeddings and cosine similarity, followed by DeepSeek-based refinement and dimension assignment.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai

July - Sep. 2025

- Identified a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Built a factor-backtesting framework that improved annualized return by 6% and Sharpe ratio by 0.3 over five years.
- Analyzed daily exposures to 10 Barra style factors to characterize signals and portfolio style tilts.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai

July - Sep. 2024

- Developed mean-variance and risk-parity models within a 15-year daily-rebalanced simulation framework.
- Implemented a Monte Carlo approach to approximate ERC weights by minimizing differences in asset risk contributions.

SELECTED QUANTITATIVE PROJECTS

Researcher, *HKU Quant Trading Team*, Hong Kong

Feb. - Aug. 2026

- Developed a Python workflow connecting live market scans, opportunity ranking, position-limit checks, order simulation or submission, and trade-level realized P&L tracking.
- Grouped historical market data by topic, contract structure, and time to resolution; refreshed estimates monthly to identify price-outcome gaps above 3 percentage points.

Independent Researcher, *University of Oxford*, Oxford, United Kingdom

Jan. - June 2025

- Implemented value iteration for a discounted MDP with discrete and exponential payment distributions to evaluate routing, liquidity-reset, and capacity policies.
