

# Jing Xiang Xu

jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

## EDUCATION

---

**Cornell University**, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

**Expected December 2027**

**The University of Hong Kong**, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

**June 2026**

**University of Oxford**, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

**July 2025**

*Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning*

## SKILLS

---

**Programming:** Python, C++, R, SQL, Shell scripting, Git, Linux

**Quantitative:** Factor Research, Portfolio Optimization, Risk Analysis, Backtesting, Data Quality

**Machine Learning / AI:** BGE embeddings, cosine similarity, DeepSeek classification and refinement

## QUANTITATIVE RESEARCH EXPERIENCE

---

**Quantitative Researcher**, *Dymon Asia Capital (HK) Limited*, Hong Kong

**May - Aug. 2026**

- Researched HSCI and HSTECH index rebalances, translating eligibility, liquidity, market-capitalization, and buffer-selection methodologies into point-in-time predictions of constituent changes.
- Achieved an 82.6% action-level hit rate (185 of 224 additions and deletions) across three HSCI rebalances using leakage-controlled evaluation.
- Built an auditable Python pipeline integrating FactSet, ERD, and HKEX filings, with DeepSeek-assisted classification and a shareholder-evidence-based free-float engine.

**Quantitative Researcher Intern**, *Rivermap Company Limited*, Hong Kong

**Feb. - Apr. 2026**

- Translated investment themes into supply-chain dimensions and mapped them to a proprietary sector taxonomy for thematic stock selection.
- Integrated financial and company-text data in Python/Pandas; implemented BGE embeddings, cosine similarity, and DeepSeek-based refinement with auditable outputs and relevance diagnostics.

**Quantitative Strategy Analyst Intern**, *Nine Martingale Investment Management, Ltd.*, Shanghai

**July - Sep. 2025**

- Analyzed daily exposures to ten Barra style factors to characterize investment signals and portfolio style tilts.
- Built a five-year factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3.
- Diagnosed a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.

**Quantitative Strategy Analyst Intern**, *Northeast Securities Co., Ltd.*, Shanghai

**July - Sep. 2024**

- Developed mean-variance and risk-parity portfolio models in a 15-year daily-rebalanced backtesting framework.
- Used Monte Carlo methods to approximate equal-risk-contribution weights by minimizing differences in asset risk contributions.

## SELECTED QUANTITATIVE PROJECTS

---

**Researcher**, *HKU Quant Trading Team*, Hong Kong

**Feb. - Aug. 2026**

- Investigated differences between prediction-market prices and realized outcomes by topic, structure, and time to resolution; refreshed estimates monthly to identify gaps above 3 percentage points.
- Built a Python workflow for live market scanning, opportunity ranking, position-limit checks, order simulation or submission, and realized P&L tracking.

**Independent Researcher**, *University of Oxford*, Oxford, United Kingdom

**Jan. - June 2025**

- Modeled Lightning Network channel management as a discounted MDP under stochastic payments; implemented value iteration to evaluate routing, liquidity-reset, and capacity policies.

## ACTIVITIES / INTERESTS

---

HKU Young Scientist Scheme; F1 racing; Texas Hold'em poker; running
