jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Systematic Research, Backtesting, Portfolio Construction, Risk Analysis, Index Rebalancing

Machine Learning / AI: Embeddings, cosine similarity, DeepSeek classification and refinement

QUANTITATIVE RESEARCH EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong

May - Aug. 2026

- Translated HSCI and HSTECH index methodologies into point-in-time eligibility, liquidity, market-capitalization, and buffer-selection rules to predict constituent changes.
- Extracted and integrated financial and market data from FactSet and Bloomberg, alongside ERD and HKEX filings, into an auditable Python research pipeline with a shareholder-evidence-based free-float engine.
- Achieved an 82.6% action-level hit rate (185 of 224 additions and deletions) across three HSCI rebalances using leakage-controlled evaluation.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai

July - Sep. 2025

- Built a five-year factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3.
- Diagnosed a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Analyzed daily exposures to ten Barra style factors to characterize investment signals and portfolio style tilts.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai

July - Sep. 2024

- Developed mean-variance and risk-parity portfolio models in a 15-year daily-rebalanced backtesting framework.
- Used Monte Carlo methods to approximate equal-risk-contribution weights by minimizing differences in asset risk contributions.

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong

Feb. - Apr. 2026

- Integrated financial and company-text data in Python/Pandas, producing auditable intermediate outputs and relevance diagnostics for thematic stock selection.
- Implemented BGE embeddings, cosine similarity, and DeepSeek-based refinement to map investment themes to a proprietary sector taxonomy.

SELECTED QUANTITATIVE PROJECTS

Researcher, *HKU Quant Trading Team*, Hong Kong

Feb. - Aug. 2026

- Built a Python research and execution workflow for live market scanning, opportunity ranking, position-limit checks, order simulation or submission, and realized P&L tracking.

Independent Researcher, *University of Oxford*, Oxford, United Kingdom

Jan. - June 2025

- Modeled Lightning Network channel management as a discounted MDP under stochastic payments and implemented value iteration to evaluate liquidity policies.
