

Jing Xiang Xu

jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Index Rebalancing, Trading Simulation, Position Limits, Backtesting, Optimization

Machine Learning / AI: Python/Pandas pipelines; embeddings, cosine similarity, DeepSeek classification

SELECTED TRADING PROJECTS

Researcher, HKU Quant Trading Team, Hong Kong

Feb. - Aug. 2026

- Compared Polymarket prices with realized outcomes by topic, market structure, and time to resolution; refreshed estimates monthly and identified pricing gaps above 3 percentage points.
- Built a Python trading pipeline to scan live markets, rank opportunities, enforce position limits, simulate or submit order-book orders, and track realized P&L.

Independent Researcher, University of Oxford, Oxford, United Kingdom

Jan. - June 2025

- Modeled payment routing, liquidity resets, and channel capacity as a discounted MDP under stochastic payments; implemented value iteration to evaluate optimal decisions.

EXPERIENCE

Quantitative Researcher, Dymon Asia Capital (HK) Limited, Hong Kong

May - Aug. 2026

- Researched HSCI and HSTECH rebalances to predict additions and deletions before announcements, translating eligibility, liquidity, market-capitalization, and buffer rules into Python logic.
- Built an auditable research pipeline from FactSet, ERD, and HKEX filings, including DeepSeek-assisted classification and a filing-based free-float engine.
- Achieved an 82.6% action-level hit rate (185 of 224 actions) across three HSCI rebalances using leakage-controlled, point-in-time evaluations.

Quantitative Researcher Intern, Rivermap Company Limited, Hong Kong

Feb. - Apr. 2026

- Automated thematic stock selection by mapping investment themes to supply-chain dimensions and a proprietary sector taxonomy.
- Built a Python/Pandas research pipeline with BGE embeddings, cosine similarity, and DeepSeek-based refinement to identify relevant sectors and companies.

Quantitative Strategy Analyst Intern, Nine Martingale Investment Management, Ltd., Shanghai

July - Sep. 2025

- Built a factor-backtesting framework that improved annualized return by 6% and Sharpe ratio by 0.3 over five years.
- Identified a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Analyzed daily exposures to 10 Barra style factors to characterize signals and portfolio style tilts.

Quantitative Strategy Analyst Intern, Northeast Securities Co., Ltd., Shanghai

July - Sep. 2024

- Developed mean-variance and risk-parity models within a 15-year daily-rebalanced simulation framework.
- Implemented a Monte Carlo approach to approximate ERC weights by minimizing differences in asset risk contributions.

ACTIVITIES / INTERESTS

HKU Young Scientist Scheme; F1 racing; Texas Hold'em poker; running
