

Jing Xiang Xu

jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Predictive Research, Leakage-Controlled Evaluation, Backtesting, Optimization

Machine Learning / AI: BGE embeddings, cosine similarity, DeepSeek classification and reranking

QUANTITATIVE RESEARCH EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong

May - Aug. 2026

- Researched HSCI and HSTECH constituent changes, translating published methodologies into point-in-time eligibility, liquidity, market-capitalization, and buffer-selection prediction rules.
- Evaluated predictions without future information across three HSCI rebalances, achieving an 82.6% action-level hit rate (185 of 224 additions and deletions).
- Built an auditable Python pipeline combining FactSet, ERD, and HKEX filings, DeepSeek-assisted classification, and a shareholder-evidence-based free-float engine.

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong

Feb. - Apr. 2026

- Converted unstructured investment themes into supply-chain dimensions and mapped them to a proprietary sector taxonomy for thematic stock selection.
- Designed two-stage semantic retrieval using BGE embeddings and cosine similarity, followed by DeepSeek refinement; integrated financial and company-text data in Python/Pandas with relevance diagnostics.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai

July - Sep. 2025

- Built a five-year factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3.
- Identified a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Analyzed daily exposures to ten Barra style factors to understand signal characteristics and portfolio style tilts.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai

July - Sep. 2024

- Developed mean-variance and risk-parity models in a 15-year daily-rebalanced backtesting framework.
- Used Monte Carlo methods to approximate equal-risk-contribution weights by minimizing differences in asset risk contributions.

SELECTED QUANTITATIVE PROJECTS

Researcher, *HKU Quant Trading Team*, Hong Kong

Feb. - Aug. 2026

- Investigated systematic differences between prediction-market prices and realized outcomes by topic, structure, and time to resolution; refreshed estimates monthly and identified gaps above 3 percentage points.
- Connected the research to a Python workflow for ranking live opportunities, enforcing position limits, simulating or submitting orders, and measuring realized P&L.

Independent Researcher, *University of Oxford*, Oxford, United Kingdom

Jan. - June 2025

- Formulated Lightning Network channel management as a discounted MDP under stochastic payments; used value iteration to derive routing, liquidity-reset, and capacity policies.

ACTIVITIES / INTERESTS

HKU Young Scientist Scheme; F1 racing; Texas Hold'em poker; running
