

Jing Xiang Xu

jx466@cornell.edu

115 S Quarry St., Ithaca, NY 14850

607-882-5108

EDUCATION

Cornell University, College of Engineering, Ithaca, NY

Master of Engineering in Financial Engineering

Expected December 2027

The University of Hong Kong, Hong Kong

Bachelor of Science in Mathematics; Minor in Computer Science; First Class Honors; GPA: 3.74

June 2026

University of Oxford, Oxford, United Kingdom

Visiting Student Program in Mathematics (ROA scholarship)

July 2025

Selected Coursework: Data Structures and Algorithms, Convex Optimization, Machine Learning

SKILLS

Programming: Python, C++, R, SQL, Shell scripting, Git, Linux

Quantitative: Data Quality, Research Pipelines, Backtesting, Portfolio Optimization

Machine Learning / AI: DeepSeek classification and reranking; BGE embeddings; prompt engineering

QUANTITATIVE RESEARCH AND DEVELOPMENT EXPERIENCE

Quantitative Researcher, *Dymon Asia Capital (HK) Limited*, Hong Kong

May - Aug. 2026

- Built an auditable ranked-waterfall Python pipeline integrating FactSet, ERD, and HKEX filings for point-in-time HSCI and HSTECH index-rebalance research.
- Implemented DeepSeek-assisted Theme and Innovation gates and a filing-based free-float engine mapping shareholder evidence to ten HSIL categories.
- Translated eligibility, liquidity, market-capitalization, and buffer rules into prediction logic; validated three HSCI rebalances with leakage controls, achieving an 82.6% hit rate (185 of 224 actions).

Quantitative Researcher Intern, *Rivermap Company Limited*, Hong Kong

Feb. - Apr. 2026

- Engineered a Python/Pandas pipeline integrating sector, revenue-segment, and company-description data, with auditable intermediate outputs and segment-level relevance diagnostics.
- Automated thematic stock selection using supply-chain dimensions and a proprietary sector taxonomy.
- Built two-stage semantic retrieval with BGE embeddings and cosine similarity, followed by DeepSeek-based refinement and dimension assignment for ambiguous queries.

Quantitative Strategy Analyst Intern, *Nine Martingale Investment Management, Ltd.*, Shanghai

July - Sep. 2025

- Diagnosed a 60-day dividend-event data lag and corrected factor alignment, increasing information coefficient by 0.02.
- Built a five-year factor-backtesting framework; improved annualized return by 6% and Sharpe ratio by 0.3.
- Analyzed daily exposures to ten Barra style factors to characterize signal behavior and portfolio style tilts.

Quantitative Strategy Analyst Intern, *Northeast Securities Co., Ltd.*, Shanghai

July - Sep. 2024

- Implemented mean-variance and risk-parity models in a 15-year daily-rebalanced backtesting framework, using Monte Carlo methods to approximate equal-risk-contribution weights.

SELECTED QUANTITATIVE PROJECTS

Researcher, *HKU Quant Trading Team*, Hong Kong

Feb. - Aug. 2026

- Built an end-to-end Python workflow for live market scanning, opportunity ranking, position-limit checks, order-book simulation or submission, and resolved-trade P&L tracking.
- Grouped historical contracts by topic, structure, and time to resolution; refreshed estimates monthly to identify price-outcome gaps above 3 percentage points.

Independent Researcher, *University of Oxford*, Oxford, United Kingdom

Jan. - June 2025

- Implemented value iteration for a discounted MDP under discrete and exponential payment distributions to evaluate routing, liquidity-reset, and channel-capacity policies.

ACTIVITIES / INTERESTS

HKU Young Scientist Scheme; F1 racing; Texas Hold'em poker; running
